Personal Profile

A highly motivated Software Engineering student specializing in Artificial Intelligence and intelligent system design. I possess strong analytical skills and a passion for developing predictive models and complex computing systems. I am eager to apply my technical background and academic knowledge to contribute to innovative AI development projects during a software engineering internship.

Education

COMSATS University

Lahore

BS Software Engineering (BSSE)

2024 to Present

Enrolled with a focus on core computing principles and maintaining an excellent academic record.

Kips College

Lahore

Intermediate (FSc Pre Engineering)

Completed 2023

Achieved 1081 marks with A+ grade in all subjects.

Nishter School

Lahore

Matriculation

Completed 2021

Achieved 1031 marks with A+ grades in all subjects.

Technical Projects

Technical Project

AI Disease Prediction and Medication System

Python and Scikit Learn

- Developed an intelligent system using Python to diagnose diseases by analyzing patient symptoms.
- Implemented machine learning models using Scikit learn and utilized Pandas for data preprocessing and analysis.
- Integrated a logic based recommendation engine that suggests appropriate medications based on predicted diseases.

Technical Project

Social Media Platform

C++ and SFML

- Developed a functional backend architecture using C++ to manage user data and real time interactions.
- Designed and implemented a graphical user interface using the SFML library for a seamless visual experience.

Technical Project

Inventory Management System

Java and JavaFX

- Built a desktop application using Java for robust backend logic and complex data handling.
- Utilized JavaFX to create a professional and responsive frontend for real time inventory tracking.

Professional Skills

Core Interests: Artificial Intelligence, Machine Learning Foundations, Neural Networks, Predictive Modeling

Technical: Software Engineering Principles, Programming (Python, C++, Java), Data Analysis, Technical Troubleshooting

Soft Skills: Problem Solving, Effective Communication, Team Collaboration, Analytical Thinking

Career Objective

To build a successful career in AI development by leveraging my Software Engineering background to create innovative and intelligent systems. I am committed to continuous learning and seek opportunities to solve real world challenges through technical expertise in an internship setting.
